How did you hear about the Summit?

Please tell us your field(s) of work: _____

This unique summit will bring together leaders from government, academia, business, health professions and the advocacy community to consider key environmental influences on Indiana water quality and human health.

This one-day event will feature nationally recognized speakers as well as local experts on water issues in Indiana. The Summit will cover the health implications of different types of water contamination and the status of water contamination in Indiana. A poster session will highlight research on water issues in Indiana.

Agenda

- 8:30 Registration and continental breakfast
- 9:00 **Introduction to Indiana's Water Resources and Challenges for Sustainable Water Quality**
Lenore Tedesco, PhD, IUPUI
- 9:30 **Pathogens in Water: Human Health Risk**
Marylynn Yates, PhD, University of California
- 10:15 Break
- 10:30 **Pharmaceuticals in the Environment — Exposure, Effects, and Risks to Humans and Ecosystems: What We Think We Know, and What We Need to Know**
Jim Lazorchak, PhD,
US Environmental Protection Agency
- 11:30 Lunch and poster session
(box lunch provided)
- 12:30 Moderated Panel Discussion*
- 2:30 Adjourn

* The panel discussion will focus on how Indiana's waters are impacted by the issues described by our keynote speakers.

Speakers

Dr. Lenore Tedesco is an associate professor of Earth Sciences and the Director of the Center for Earth and Environmental Science at Indiana University Purdue University Indianapolis. Her research focuses on water resources, wetland and stream restoration, and environmental education

Dr. Marylynn Yates is a professor of Environmental Microbiology at the University of California. Dr. Yates' research focuses on water and wastewater microbiology and pathogens in groundwater and surface water.

Dr. Jim Lazorchak is an aquatic biologist and toxicologist for the U.S. Environmental Protection Agency National Exposure Research Laboratory, and is the Acting Chief of the Molecular Indicators Research Branch. His current research focuses on pharmaceuticals in wastewater.

Panelists

Beverly Gard - Indiana State Senator
Jeffrey Frey - US Geological Survey
Roger Myerhoff - Lilly Pharmaceuticals
Bruno Pigott - IN Department of Environmental Management
Ron Turco - Purdue University
Richard VanFrank - Improving Kids' Environment
Jim Hurst - Veolia Water North America
